

The Centers for Disease Control (CDC) report that each year in New York:

**1 in 6**

children are diagnosed with developmental disabilities (725,166 kids)

**1 in 33**

babies are born with birth defects (132,000 kids)

**1 in 59**

are disabled from accidents (74,000 kids)

**1 in 68**

have a form of Autism (64,000 kids)

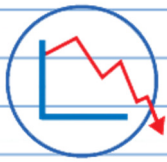

Too many of these children are permanently hospitalized or institutionalized—unnecessarily—because support for at-home care is not in place.

## ENTER SKIP OF NEW YORK

SKIP acts as a free medical concierge providing services and equipment to medically fragile children, so they can heal at home.

Reduces the impact of lifelong challenges

Helps children reach their full potential

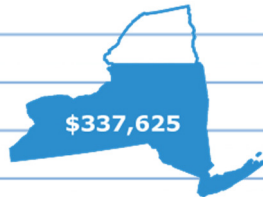

Enhances the healing process

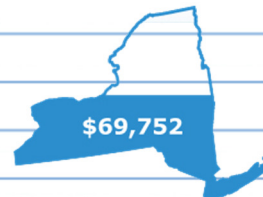

Reduces the cost of care

## Average New York State Healthcare Costs

In-hospital cost per child

At-home care cost per child

SKIP saves \$50 million in public expenses annually

Which is a saving of over 80% per child

But most importantly, SKIP helps **5,000 medically fragile children each year**
